Futura Glass

Light Fibreglass Filler

FEATURES AND BENEFITS

- Much more flexible than other fiberglass putty.
- Absorbes vibrations whereas conventional putties cracks.
- Provides a premium finish with no pinholes to become a 1 step fiberglass putty.
- Extraordinary reduction of sanding process.
- Much easier application due to its finer and more creamy texture.
- Sanding process starting with P120 and finishing with P220. Finer grits for much better finish.
- Multifunction filler with good adherence on steel; aluminium; galvanised and GRP.
- Time-saving of up to 80% in equipment repairs compared with other conventional fiber putties.
